Feeling of euphoria followed by drowsiness; nausea & vomiting; respiratory depression; central nervous system depression; use of unsterile needles promotes - AIDS, hepatitis B, endocarditis (infection in the heart); women dependent on opiates have multiple pregnancy complications - spontaneous abortions, still births, anemia, diabetes.

LAWS REGARDING ALCOHOL AND DRUGS

State of Illinois
In addition to the Federal laws, the State of Illinois has its own laws dealing with controlled substances.

Alcohol:
Under age consumption and/or possession -misdemeanor, 30 days to 1 year and/or $500 to $1000 fine
DUI $100 to $1000 fine, possible confinement 48 yrs. to 1 year

Marijuana:
2.5 grams or less – 30 days maximum, $500 fine
2.5 to 10 grams – 6 months maximum, $500 fine
10-30 grams – 1 year maximum, $1000 fine
30-500 grams – 1 to 3 years, $1000 fine
500 grams or more – 2 to 5 years, $150,000 fine

All other narcotics:
Felony – amount possessed will determine penalty – 1 to 30 years, $1000 to $200,000 fine
Federal
Federal law penalizes the unlawful manufacturing, distribution, use, sale, and possession of controlled substances. The penalties vary based on many factors, including the type and amount of the drug involved and whether there is intent to distribute. Federal law sets penalties for first offenses ranging from less than one year to life imprisonment and/or fines up to $10 million. Penalties may include forfeiture of property, including vehicles used to possess, transport, or conceal a controlled substance; the denial of professional licenses or Federal benefits, such as student loans, grants, and contracts; successful completion of a drug treatment program; community service; and ineligibility to receive or purchase a firearm. Federal law holds that any person, who distributes, possesses with intent to distribute, or manufactures a controlled substance on or within one thousand feet of an educational facility is subject to a doubling of the applicable maximum punishments and fines. See the Federal Controlled Substances Act at 21 USC 800.

ALCOHOL AND OTHER DRUGS - ABUSE AND EFFECTS

Physical
- Increased heart rate and skin temperature
- Loss of muscle control leading to slurred speech
- Hangover miseries: fatigue, nausea, headache
- Falls, cuts and bruises are common results of alcohol abuse
- Automobile accidents are one of the most common causes of death and serious injury for young people. Victims may include bystanders as well as the drinkers themselves. Even a single binge can have long-lasting consequences.

Psychological
- Impaired judgment (of space, time, etc.)
- Impaired thinking and reasoning processes; poor concentration
- Loss of inhibitions: exaggerated feelings of anger, fear, anxiety, etc.
- Heavy Drinking (frequent drinking to intoxication over an extended period) can have serious consequences. For example:
  - Alcoholism
  - Damage to brain cells
  - Malnutrition
  - Increased risk of cirrhosis, ulcers, heart disease, heart attack, and cancers of liver, mouth, throat, and stomach
  - Degeneration of muscle and bone
  - Blackouts and memory loss
  - Hallucinations
  - Poor concentration
  - Personality disorders, increased tension, anger, and isolation
  - “DTs” (delirium tremens) - shaking, hallucinations, etc., - due to withdrawal from alcohol

Additional signs of an alcohol or other drug abuse problem in various aspects of your life:
- Physical: Your eating habits become poor, memory loss and/or blackouts will occur, and you become more susceptible to illness.
- Emotional: You will develop moody and aggressive behavior towards others and experience relationship problems.
- Intellectual: Reality will become distorted; all your difficulties become someone else’s fault, and you try to rationalize that your alcohol and other drug usage is not part of the problem. Paranoia may develop with prolonged use of alcohol and other drugs.
- Social: You profess that the only “good party” offers ample amounts of your drug of choice, and you will not attend a non-alcoholic/drug free function without using beforehand.
- Occupational: You are willing to risk job loss by using at work or coming to work under the influence.

Warning signs of a drinking problem:
- Denial: Lies about drinking, minimizing number of drinks, avoids reference to drinking.
- Loss of Control: Repeated promises “to be more careful” or “to cut down.” Gets drunk when intending to stay sober.
- Drinking to feel normal, drinking to cope, escape, solve problems, or to feel better.
